- Photoshop
- Figma
- Canva

LANGUAGES

- English • Hindi
- Kannada • Malayalam

ABOUT

Passionate and self-taught MERN stack developer with a strong enthusiasm for solving problems digitally. Committed to staying up-to-date with the latest technologies and constantly seeking new opportunities to expand knowledge and skills through challenging projects. Dedicated to delivering high-quality, visually appealing, and innovative solutions.

WORK EXPERIENCE

FRONTEND DEVELOPER

NECTAR. Ernakulam, Kerala

Aug 2023 - Till date

- Collaborated with cross-functional teams, including designers and backend developers, to ensure seamless integration of frontend components into the overall product architecture.
- built 100% reusable code and libraries for future use.
- Participated in agile ceremonies, consistently delivering high-quality code on tight deadlines.
- Skilled in identifying and resolving complex issues, leading to improvements in system uptime and user satisfaction ratings.
- Engaged in product releases and code reviews with senior developers and team leads.

PROJECTS

- **Report Generator Tool:** Created a custom report generator using Report.js recipes such as HTML-to-XLSX, Chrome PDF, XLSX, HTML, etc., to produce dynamic PDF and Excel reports with scheduling features and dynamic images.
- **Custom Dashboard:** Designed and developed custom dashboards tailored to user needs, incorporating dynamic charts, real-time data updates, and user-friendly interfaces.
- **Bulk Data Upload:** Implemented a feature for users to upload Excel files, displaying data in an editable table with validation. Users can directly save changes.

PROJECTS

QUICKSERVE | LOCAL SERVICE PROVIDER

- Developed a responsive local service provider app using the MERN stack with MVC architecture, featuring advanced service filtering, Admin and Provider panels with charts, real-time chat via Socket.io, and integrated Razorpay payment gateway.
- Technologies used: React.js, React Redux, Node.js, Axios, Mongoose, JWT, Material UI, Tailwind CSS, Socket.io.
- Github:// [QuickServe](#)

GADTECH | E-COMMERCE WEBSITE FOR GADGETS

- Built a responsive e-commerce site for gadgets using Node.js, Express.js, MongoDB, Handlebars, CSS, and Bootstrap in MVC architecture, including product listing, cart, orders, payment, product filtering, search, and an admin panel with charts and sales reports.
- Managed coupon system, implemented OTP verification using Nodemailer, and integrated the PayPal payment gateway.
